### **Vestas receives order for 49 units of the V80-2.0 MW wind turbine to South Korea**

The Vestas Group has received an order for delivery of 49 units of the V80-2.0 MW turbine for the Gangwon Wind Park project located in north-eastern South Korea. The project is placed on two parallel mountain crests near the Odaesan National Park in the county of Pyeongchang.

The 98 MW order has been placed by Gangwon Wind Power Co., Ltd. The order comprises delivery, supervision of installation and commissioning, remote control system as well as a five-year service and maintenance agreement.

Shipment of the turbines will begin in 2005 and commissioning of the wind power plant will take place in two phases i.e. 28 MW in December 2005 and the remaining 70 MW during the second half of 2006.

The 98 MW project is the largest order received by Vestas so far in South Korea. To carry out the turnkey supply, Vestas has entered into a consortium with Unison Co., Ltd. from South Korea.

*"It is very satisfactory that the V80-2.0 MW wind turbine once again has proven its competitiveness in Asia," says Ditlev Engel, President and CEO of Vestas Wind Systems A/S and continues: "The positive expectations for the South Korean market are supported by the specified targets for renewable energy aiming at increasing renewable energy's share of the total energy supply from approximately 1% in 1999 to approximately 5% in 2011. Vestas' recent decision to establish a branch office in South Korea is also based on the expectations for a continued positive market development in South Korea."*

The above order does not affect the Vestas Group's expectations for 2005, cf. Stock exchange announcement No. 15/2005 of 26 May 2005.

Any questions may be addressed to the Executive Management at Vestas Wind Systems A/S, telephone +45 9730 0000.

Yours sincerely  
**Vestas Wind Systems A/S**
