Vestas receives orders for V80 turbines for France

The Vestas Group has received orders for a total of 18 units of the V80 wind turbine for three wind farms to be located in the Beauce region in France. The orders have been placed by Mistral Windfarms 1 LP and Mistral Energy 1 LP. When completed, the three projects will together form one of the largest wind parks in France.

Delivery of the turbines will begin in the spring of 2006 and commissioning of the wind power plants is expected to take place during the summer of 2006.

"We are very pleased with these new contracts for MW-turbines for France, which confirms that our customers have confidence in our products, which among other things is based on our long track record of more than 1,200 units of V80-2.0 MW turbines," says Ebbe Funk, President of Vestas Mediterranean West and continues: *"The French market shows signs of strong development for 2006, and our local subsidiary, Vestas France, will certainly play a significant role in the development of the market"*.

The above order does not affect the Vestas Group's expectations for 2005, cf. Stock exchange announcement No. 28/2005 of 25 August 2005.

Any questions may be addressed to the President of Vestas Mediterranean West, Ebbe Funk, phone: +34 93241 9800 or to IR Manager, Michael Nielsen at Vestas Wind Systems A/S, phone +45 97 30 00 00.

Yours sincerely
Vestas Wind Systems A/S

Ditlev Engel
President and CEO
