### **Vestas receives an order for 25 units of V90-3.0 MW wind turbines in Australia**

The Vestas Group has received an order for 25 units of the V90-3.0 MW wind turbine for the Studland Bay Wind Farm, which will be located in the northwest of Tasmania. Studland Bay is the third phase of the Woolnorth Wind Farm where the previous two phases consist of 37 units of V66-1.65 MW wind turbines.

The 75 MW Woolnorth Studland Bay Wind Farm order will be delivered to Roaring 40s, a joint venture company owned by Hydro Tasmania and China Light and Power. The order consists of delivery, installation and commissioning, remote control system as well as a 5-year service and maintenance agreement. Shipment of the turbines will begin in 2006, and commissioning of the wind power plant will take place during the third quarter of 2006.

*"This order represents the first order in Australia for the 3.0 MW platform and we are proud to receive the order from Roaring 40s. This order is a continuation of our relationship with Roaring 40s, who is one of Vestas' largest customers in the region and one of the pre-eminent renewable energy companies in Asia-Pacific," says Thorbjørn N Rasmussen, President of Vestas Asia Pacific A/S and continues: "We are pleased to be awarded another large project in Australia and in particular in Tasmania where Vestas also has a nacelle assembly plant in the northwest region of the state. The order once again demonstrates Vestas' strong position in the market."*

Australia has some of the best wind resources in the world. The Australian market is driven by the availability of the Mandatory Renewable Energy Target (MRET). It is Vestas' understanding that the present government does not intend to extend the MRET. The consequence of the government's policy is that the long-term market potential for wind power in Australia is considered very unstable.

The above order does not affect the Vestas Group's expectations for 2005, cf. Stock exchange announcement No. 28/2005 of 25 August 2005.

Any questions may be addressed to the President of Vestas Asia Pacific A/S, Mr Thorbjørn N Rasmussen, or to the Vice President of Communication & IR at Vestas Wind Systems A/S, Annette Munk Rasmussen, both on telephone +45 9730 0000.

Yours sincerely  
**Vestas Wind Systems A/S**
