### **Vestas receives another large order for Spain**

The Vestas Group has received an order for a total of 58 units of the V90-2.0 MW wind turbine for three wind power projects in Spain. The order has been awarded by the company Enel Unión Fenosa Renovables, S.A., a branch of the Italian energy group Enel and Spanish Unión Fenosa, one of the largest renewable energy producers in Spain with an installed capacity of 900 MW in Spain.

The order consists of supply and commissioning of the turbines as well as VestasOnline remote monitoring systems. Delivery of the turbines will begin in the summer of 2006, and commissioning of the wind power plants is planned to take place from the autumn of 2006 until the beginning of 2007. The projects will be located in the regions of Castilla La Mancha and Castilla y León, which have a total capacity of installed wind power of more than 4,000 MW.

*"I am very excited with these new projects,"* says Ebbe Funk, President of Vestas Mediterranean West A/S and continues: *"Enel Unión Fenosa Renovables, S.A. and Vestas have had a good and close relationship during the last eight years, and the order is a further strengthening of our relationship."*

The nacelles for the projects will be delivered from Vestas' new nacelle factory in Villadangos del Paramo (León) in Castilla y León, which is scheduled to start production during the first half of 2006.

The above order does not affect the Vestas Group's expectations for 2006, cf. Stock exchange announcement No. 40/2005 of 24 November 2005.

Any questions may be addressed to the Executive Management at Vestas Wind Systems A/S, telephone + 45 9730 0000 or to Ebbe Funk, President of Vestas Mediterranean West A/S, telephone +34 93 241 98 00.

Yours sincerely  
**Vestas Wind Systems A/S**
