Vestas extends its blade factory in Tianjin, China

Even before the establishment of the new blade factory in China has been completed, the Vestas Group has decided to double the production capacity of the factory.

In stock exchange announcement No. 22/2005 of 7 July 2005, Vestas Wind Systems A/S informed about the establishment of a blade factory in Tianjin Economic Technological Development Area (TEDA). This factory is expected to be ready for production in May 2006, and the extension of the factory, which is expected to be operational by the middle of 2007, will double the original factory's annual production capacity from approx 600 blades to approx 1,200 blades. Furthermore, the extension will increase the number of staff from approx 240 to approx 400 employees.

"The establishment of the factory in China is progressing according to the schedule, and the first 39 metre-blades for the V80-2.0 MW wind turbine are expected to be produced in May this year. We are therefore very pleased to note that satisfactory order coverage as well as continuous good market prospects for China as well as for the rest of Asia mean that the decision to extend the factory has already been taken now. With the extension, we also look forward to continuing the good co-operation with TEDA," says Ole Borup Jakobsen, President of Vestas Blades A/S.

Apart from a doubling of the production area, the extension includes a shared administrative building together with the factory for assembly of nacelles and hubs (cf. stock exchange announcement No. 5/2006 of 19 January 2006). The total investment in the extension is expected to amount to approx EUR 13m.

"With the extension of the blade factory we have taken yet another step in the direction of fulfilling the market demands which we are facing in China and in the rest of Asia. This is a strengthening of Vestas' position in the market and it improves our ability to meet the market growth and the customers' needs. This is also confirmed through the large order intake which Vestas has experienced lately," says Thorbjørn N. Rasmussen, President of Vestas Asia Pacific A/S.

The above investment does not affect the Vestas Group's expectations for 2006, cf. Stock exchange announcement No. 16/2006 of 29 March 2006.

Any questions may be addressed to the Executive Management at Vestas Wind Systems A/S, to Ole Borup Jakobsen, President of Vestas Blades A/S or to Thorbjørn N. Rasmussen, President of Vestas Asia Pacific A/S, telephone: +45 9730 0000.

Yours sincerely
