Vestas receives an order for 29 units of the V90-1.8 MW turbine in Spain

The Vestas Group has received an order from the reputable Spanish wind farm developer, Energias Alternativas de Castilla La Mancha, S.L. for 29 units of the V90-1.8 MW turbine. The order is a turnkey order for two projects in Spain, and it also includes VestasOnline remote monitoring systems.

Delivery of the turbines will begin in the summer of 2007, and the wind power plants will be completed by the end of 2007.

The projects will be located in the region of Castilla La Mancha in the central east of Spain. The region is the second largest region in Spain in terms of installed wind power with more than 2,000 MW installed. As at 31 December 2005, Vestas has installed 76 MW in the region.

"The fact that Energias Alternativas de Castilla La Mancha, S.L. has chosen Vestas as supplier for their projects is a further strengthening of our presence in Castilla La Mancha," says Ebbe Funk, President of Vestas Mediterranean West A/S and continues: *"Furthermore, this order confirms our positive expectations for the V90 turbine in Spain."*

The above order does not affect the Vestas Group's expectations for 2006, cf. Stock exchange announcement No. 16/2006 of 29 March 2006.

Any questions may be addressed to the Executive Management at Vestas Wind Systems A/S, telephone +45 9730 0000 or to Ebbe Funk, President of Vestas Mediterranean West A/S, telephone +34 93 241 98 00.

Yours sincerely
Vestas Wind Systems A/S

Ditlev Engel
