Vestas receives an order for 31 units of the V82 turbine in Spain

The Vestas Group has received an order from the reputable Spanish wind farm developer, Parque Eólico de Alentisque S.L. for 31 units of the V82 turbine. The order is a turnkey order and also includes a VestasOnline™ remote monitoring system.

The project will be located in the region of Castilla y León, in the west central part of Spain. Vestas has in total installed 233 MW in the region which is the third largest region in Spain in terms of installed wind power with more than 2,000 MW installed as per 31/12/2005.

Vestas is already represented in the region with two factories. *"In 2003, Vestas built a control system factory in Soria, and this year we have completed the construction of our V90 nacelle production unit in Villadangos. The fact that Parque Eólico de Alentisque S.L. has chosen Vestas as supplier for their project is a further strengthening of our presence in Castilla y León"* says Ebbe Funk, President of Vestas Mediterranean A/S.

Delivery of the turbines will begin in November 2006, and the wind power plant will be completed in 2007. The wind power plant is estimated to produce 136,000 MWh per year, which corresponds to a saving of 74,528 tons of CO₂ emission to the atmosphere.

The above order does not affect the Vestas Group's expectations for 2006, cf. Stock exchange announcement No. 16/2006 of 29 March 2006.

Any questions may be addressed to Ebbe Funk, President of Vestas Mediterranean A/S, telephone +34 93 241 9800 or to Peter Wenzel Kruse, Vice President of Communication & IR at Vestas Wind Systems A/S, telephone +45 9730 0000.

Yours sincerely
Vestas Wind Systems A/S
