Vestas receives another order for Spain

Vestas has received an order for 32 units of the V90-2.0 MW wind turbine for two projects in Spain: 20 units for the Sierra de las Carbass project to be installed in the province of Zamora, and 12 units for the Sargentess project for the province of Burgos, both located in the region of Castilla y León. The order includes supply, installation, commissioning, a VestasOnline™ Business SCADA Solution as well as a five-year service contract.

The order has been placed by Urbaenergía S.L., a subsidiary of the ACS/Cobra Group, which is an important player in the renewable energy industry in the Spanish market. Urbaenergía S.L., together with EYRA – both subsidiaries of the same group - are wind project developers and they have already signed three contracts with Vestas for a total of 130 MW, which will be constructed in 2007 and 2008.

“We are very proud that ACS/Cobra has chosen Vestas as supplier for this wind power project, which demonstrates their confidence in us and our products,” says Juan Araluce, President of Vestas Mediterranean A/S, and continues “We look forward to a long and fruitful cooperation with ACS/Cobra and we are glad to continue strengthening our position in Castilla y León where Vestas also has two factories in Villadangos and Ólvega.”

Vestas has already installed 233 turbines in Castilla y León, amounting to a total of 245 MW. This region has a very strong wind potential and is considered among the most promising wind regions in Spain.

The Sargentess and the Sierra de las Carbass wind power plants will annually save the environment from approx 36 and 58 tons of CO₂, respectively. The total production of both wind power plants will provide enough electricity to power approx 35,200 Spanish households.

Delivery of the wind turbines is scheduled to start in September 2008 and March 2009, for the Sargentess and Sierra de las Carbass projects, respectively. Commissioning is expected in February and September 2009, respectively.

The above order does not affect Vestas' expectations for 2007 and 2008, cf. Company announcement No. 35/2007 of 6 November 2007.

Any questions may be addressed to Juan Araluce, President of Vestas Mediterranean A/S, telephone +34 93 241 98 00 8013, or to Peter Wenzel Kruse, Senior Vice President of Group Communications at Vestas Wind Systems A/S, telephone +45 4110 4897.

Yours sincerely
Vestas Wind Systems A/S
