Vestas receives order for 74 MW for the Spanish market

Vestas has received an order for a total of 37 units of the V90-2.0 MW turbine for Les Rotes y Monclues project in Spain. The contract comprises supply, installation, a VestasOnline™ Business SCADA solution as well as a five-year service agreement.

The order has been placed by Eolia Renovables, one of the major companies in the Spanish renewable energy sector.

The project will be located in the province of Lerida in the Catalan Pyrenees. As of 1 January 2008, the Catalonian region has a total installed capacity of 347 MW, and a target of 1,000 MW installed by 2010.

"We are very satisfied that Eolia Renovables has chosen Vestas to take advantage of the wind potential of Catalonia," says Juan Araluce, President of Vestas Mediterranean A/S, and continues: *"This new contract is a further step towards developing Vestas' position in this region, which has a growing interest in wind energy."*

Delivery of the wind turbines for Les Rotes y Monclues will begin in 2009. With an estimated annual production of approx 144 GWh, the wind power plant will satisfy the electricity needs of approx 66,000 Spanish households and will correspond to an annual emission saving of almost 60,000 tons of CO₂.

The above order does not affect the Vestas Group's expectations for 2008, cf. Company announcement No. 25/2008 of 8 May 2008.

Any questions in relation to the order may be addressed to Juan Araluce, President of Vestas Mediterranean A/S, telephone +34 93 241 98 00, or to Peter Wenzel Kruse, Senior Vice President of Group Communications at Vestas Wind Systems A/S, telephone +45 9730 0000.

Yours sincerely
Vestas Wind Systems A/S
