Vestas receives another large order for the Spanish market

Vestas has received an order for 66 MW for another four projects in Spain. The contract includes 28 units of the V90-1.8 MW wind turbine and 8 units of the V80-2.0 MW wind turbine. The order comprises supply, installation, a VestasOnline™ Business SCADA system, as well as a five-year service contract.

The order has been placed by Enel Unión Fenosa Renovables (EUFER) – owned 50 per cent by Enel and 50 per cent by Unión Fenosa. EUFER has a total installed capacity of more than 1,200 MW including wind power plants, small hydroelectric power stations and cogeneration power stations. With an experience of almost two decades in the market, EUFER confirms its high commitment to the environment and to sustainable development.

“We are very satisfied that we have signed this new contract for the Spanish market, which once again, confirms EUFER’s confidence in Vestas and our technology. Together with the 112 MW order received from EUFER last week, EUFER’s recent orders amount to a total of 97 wind turbines distributed on eight wind power plants in Spain,” says Juan Araluce, President of Vestas Mediterranean A/S.

The four projects i.e. Peña 1 and 2 and Picazo and Monteneme, will be installed in Guadalajara in the region of Castilla-La Mancha, which is the region with the highest total installed wind capacity in Spain with 3,131 MW installed by 1 January 2008. Delivery and commissioning of the wind turbines are scheduled to start in 2009.

With an estimated annual production of approx 181 GWh, the four wind power plants will save the environment from more than 104,000 tons of CO₂ per year and will provide enough electricity to power more than 39,000 Spanish households.

The above order does not affect the Vestas Group’s expectations for 2008, cf. Company announcement No. 25/2008 of 8 May 2008.

Any questions may be addressed to Juan Araluce, President of Vestas Mediterranean A/S, telephone +34 93 241 98 00 or email juara@vestas.com, or to Peter Wenzel Kruse, Senior Vice President of Group Communications at Vestas Wind Systems A/S, telephone +45 9730 0000.

Yours sincerely
Vestas Wind Systems A/S
