Vestas receives large 3 MW order for Romania

Vestas has received an order for delivery of 67 x V90-3.0 MW wind turbines for Romania from S.C. Ewind S.R.L and S.C. Wind Power Park S.R.L., Romania. The contract includes delivery, installation and commissioning of the turbines and a long-term service agreement.

The wind turbines will be delivered to two projects in the region of Constanta in Romania during 2009 and 2010.

„We are very satisfied with this new contract, which shows the positive development of the wind energy market in the Eastern European countries. We are particularly happy about this contract which is the first large contract for us in Romania and it confirms our positive expectations for this market. Additionally, we are very happy to be working with S.C. Ewind and S.C. Wind Power Park on these projects and we are pleased about their confidence in Vestas' technology,“ says Hans Jørn Rieks, President of Vestas Central Europe A/S.

The two wind power projects are developed by one of the key wind development companies in Romania, Monsson Alma SRL from Constanta: *“Vestas is the perfect partner for us and we look forward to a trustful cooperation with our new business partner,“* the general manager of the wind developing company declares.

The above order does not affect the Vestas Group's expectations for 2009, cf. company announcement No. 46/2008 of 6 November 2008.

Yours sincerely
Vestas Wind Systems A/S

Ditlev Engel
President and CEO
