### Vestas receives order in Greece for V90-3.0 MW turbines

Vestas Hellas has received an order for 10 units of the V90-3.0 MW turbine for the Immerovigli project in Greece. The order comprises delivery and installation of the wind power plant and a five-year warranty, operation and maintenance agreement.

The project will be installed on the Kefallonia Island situated in the Ionian Sea in Greece. Delivery of the project will start in the spring of 2007 and the project will be commissioned during the summer.

The order has been placed by EEN Hellas SA, a subsidiary of the French holding company EDF Energies Nouvelles. EEN Hellas SA is a very good customer of Vestas Hellas, and the company has already completed several projects with Vestas in Greece. The latest project, the Achladokambos project in Argolida, consisting of 10 units of the V90-3.0 MW turbine was recently inaugurated by the Greek Minister of Development.

*"At Vestas Hellas, we are very pleased to continue our excellent relationship with EEN Hellas which is one of the leading companies within wind energy in Greece, and we look forward to repeating a successful collaboration on the Kefallonia Island project,"* says Johnny Holm, General Manager of Vestas Hellas. *"The Greek government recently announced a tender for an additional 30 MW to be built on the island hereby making the island another important Greek region for wind energy together with Peloponnese, Evia, Crete and Thrace where Vestas is already present,"* Johnny Holm concludes.

The wind power plant has an estimated annual production of 75.5 GWh, which corresponds to an annual emission saving of 41,350 tons CO<sub>2</sub>. The annual electricity production will cover the annual electricity consumption of 8,600 households on Keffalonia.

Any questions in relation to the order may be addressed to Mr Johnny Holm, General Manager of Vestas Hellas, telephone +30 210 964 6251 or to Mr Ebbe Funk, President of Vestas Mediterranean A/S, telephone +34 93 241 9800.

Yours sincerely
