Vestas receives order for V90-2.0 MW wind turbines for Spain

Vestas Mediterranean has received an order for 10 units of the V90-2.0 MW wind turbine. The order comprises supply, installation, commissioning, VestasOnline™ Business SCADA solution and a five-year operation, maintenance and service contract for the Serra do Páramo project in Galicia, Spain.

The order has been placed by the developer VIRANDEL, S.L. The order is the first order that Vestas signs with VIRANDEL, S.L., and Vestas has great expectations for a long and fruitful cooperation with the customer.

The project will be installed close to the town of Sarria situated in the province of Lugo in Galicia. Delivery is scheduled to start in January 2008, and the project will be completed in June 2008.

The wind power plant has an estimated annual production of more than 54,000 MWh, which corresponds to an annual emission saving of 29,700 tons CO₂.

“Vestas’ expectations for the Galician region are high. We are very satisfied with this order which is the ninth order for wind power plants to be installed in Galicia, which Vestas has received in 2006,” says Mr Javier Rodriguez, General Manager of Vestas Eólica and continues: *“Besides service operations, Vestas is present in Galicia with a nacelle assembly factory employing 150 people.”*

Galicia is considered to be one of the six regions with the major wind power developments in the world. Expectations for the market for the coming years are optimistic and the demand for energy is increasing. By the end of 2005, a total of 2,369 MW were installed in Galicia (out of a total of 10,028 MW in Spain), and the objective is set to 3,400 MW by 2010. Vestas currently has more than 400 MW in service in Galicia.

Any questions in relation to the order may be addressed to Mr Javier Rodriguez, General Manager of Vestas Eólica, telephone +34 91 567 00 51 6115 or to Mr Ebbe Funk, President of Vestas Mediterranean A/S, telephone +34 93 241 9800

Yours sincerely

Vestas Mediterranean A/S
