Vestas receives order for 14 units of the V90-3.0 MW wind turbine for Andalusia, Spain

Vestas Eólica has received an order for 14 units of the V90-3.0 MW wind turbine for the project Cortijo de Guerra in Andalusia. The order comprises supply, installation, commissioning, VestasOnline™ Business SCADA system as well as a service contract for two years.

The order has been placed by the developer Parque Eólico Puerto Real S.L.U., which is owned by the Danish independent renewable power producer EuroTrust A/S. EuroTrust A/S is listed on the NASDAQ stock exchange and has through its subsidiaries installed 65 Vestas wind turbines in Germany and in Italy during 2006. This is the first order which EuroTrust places with Vestas in Spain.

"We are very pleased to sign the contract for the project Cortijo de Guerra with the Danish independent renewable power producer EuroTrust. The fact that they have chosen Vestas as supplier for their power plant in Spain reflects their great trust in our working relationship and hopefully lays grounds for a future cooperation in Spain," says Javier Rodriguez, General Manager of Vestas Eólica in Spain.

Referring to the closing of the contract, Bo Kristensen, Chief Executive Officer of EuroTrust A/S, states: *"We are delighted to cooperate with Vestas again. This year, we are entering a number of European countries, and we are very pleased to realize our first project in Spain."*

The project was developed by the German developer WKN Windkraft Nord AG (WKN). Having an installed wind power capacity of more than 570 MW, WKN is an international player in the wind industry with subsidiaries in several European countries as well as in the US. WKN's CEO Martinus Scherweit says: *"In addition to our international projects under construction in Italy and the US, it gives us great pleasure having completed another contract with Vestas for the Cortijo de Guerra project."*

The project will be installed near the town of Puerto Real located in the region of Cadiz in Andalusia. Delivery is scheduled to begin in the second half of 2007, and the project will be completed during the first half of 2008.

When completed, the project will be the largest project in Spain comprising V90-3.0 MW wind turbines. The wind power plant will have an estimated annual production of 98,000 MWh, which corresponds to an estimated annual emission saving of 54,000 tons of CO₂.

Any questions in relation to the order may be addressed to Mr Javier Rodríguez, General Manager of Vestas Eólica, telephone +34 91 567 00 51 or to Mr Ebbe Funk, President of Vestas Mediterranean A/S, telephone +34 93 241 9800

Yours sincerely
Vestas Mediterranean A/S
