Vestas to deliver 21 V90 turbines to ENEL UNION FENOSA Renovables (EUFER)

Vestas Eólica has received an order for 21 units of the V90-1.8 MW wind turbine for the project Caldereros in Castilla-La Mancha, Spain. The order comprises supply, installation, commissioning, VestasOnline™ Business SCADA system as well as a service contract for five years.

The order has been placed by Enel Unión Fenosa Renovables (EUFER), one of the most important players on the Spanish wind energy market. In recent years, EUFER has transformed into one of the top five wind energy operators on the Iberian Peninsula. By December 2006, the company had a track record of a total installed capacity of 924 MW.

"We are very satisfied that we have signed this new contract with one of our most longstanding customers in Spain. Vestas has already installed a total of 179 MW in cooperation with Enel Unión Fenosa Renovables in four different communities in Spain," says Mr Javier Rodríguez, General Manager of Vestas Eólica S.A.U and continues: *"We hope to continue this fruitful relationship with Enel Unión Fenosa Renovables in the future."*

Ebbe Funk, President of Vestas Mediterranean A/S adds: *"With this new order, we are further strengthening our position in Castilla-La Mancha, where we recently announced the establishment of a blade factory with a total investment of approx EUR 47m."*

The project will be installed near the municipalities of El Pobo de Dueñas y Hombrados in Guadalajara, Castilla-La Mancha. Delivery is scheduled to begin in January 2008, and the project will be completed by August 2008.

The wind power plant has an estimated annual production capacity of 111,419.00 GWh, which corresponds to an annual emission saving of 63,955 tons of CO₂.

Vestas Eólica S.A.U.

Vestas has been operating in the Spanish market since the 1980's. Located in Barcelona, Madrid and Zaragoza, Vestas Eólica S.A.U. is the Spanish company of Vestas, responsible for sales, installation, service and maintenance of wind power plants.
