Vestas receives a 50 MW order for Spain

Vestas Eólica has received an order for the Negredo y la Calzada project in Castilla y León, Spain. The order is for 25 units of the V90-2.0 MW turbine and comprises of supply, installation and commissioning of the turbines as well as a 5-year service and maintenance agreement. The wind power plant will be located in Merindad del río Ubierna y Montorio in Burgos (Castilla y León).

The order has been placed by Urbaenergía, S.L., a company fully owned by the ACS Cobra Group, which is an important player in the Spanish energy market. During 2007, the ACS Cobra Group has already awarded Vestas with three contracts for a total of 130 MW for different projects in Spain. The companies that will own the wind power plant are Energías Naturales El Negredo, S.L. and Energías Naturales La Calzada, S.L.

In December 2006, Vestas had a total installed capacity of approximately 244 MW in Castilla y León. Having several projects under construction in this region, and a control systems factory in Olvega (Soria), Vestas reasserts its position in Castilla León with this new contract.

"The fact that Urbaenergía has chosen Vestas for this project, after signing a contract for 50 MW in April 2007, strengthens the excellent commercial relations between Vestas and the ACS Cobra Group," says Javier Rodríguez, General Manager of Vestas Eólica S.A.U.

Delivery is scheduled to start in July 2008, and the project is expected to be completed in February 2009.

The Negredo y La Calzada project will save the environment from approximately 71,200 tons of CO₂ per year.

Vestas Eólica S.A.U.

Vestas has been operating in the Spanish market since the 1980's. Located in Barcelona, Madrid and Zaragoza, Vestas Eólica S.A.U. is the Spanish company of Vestas, responsible for sales, installation, service and maintenance of wind power plants.

To ensure proximity to its clients, Vestas established two nacelles production facilities in Villadangos (León) and in Viveiro (Lugo) and a control systems production in Ólvega (Soria).

Furthermore, Vestas established a customer service centre in La Muela, Zaragoza and two service and maintenance centres in Zaragoza and in La Coruña. In Spain, Vestas has approximately 700 employees.

Vestas Eólica has been awarded ISO 9001, ISO 14001 and OHSAS 18001 certifications and is constantly striving for high quality standard to be respected and applied.

Any questions in relation to the order may be addressed to Javier Rodríguez, General Manager of Vestas Eólica S.A.U., tel. +34 91 567 00 51 6115, or to Ebbe Funk, President of Vestas Mediterranean A/S, Tel. +34 93 241 9800.

Yours sincerely
Vestas Mediterranean A/S
