Vestas receives order in Poland for V80-2.0 MW wind turbines

Vestas Northern Europe has received an order for 24 units of the V80-2.0 MW wind turbine for the Zajaczkowo wind power project in Poland. The order has been placed by the project company Zajaczkowo Windfarm Sp. Z o.o. formed by Mitsui and J-Power, Japan. Mitsui and J-Power have developed wind power plants both in and outside Japan with a total accumulated capacity of more than 178 MW and 275 MW, respectively.

The order comprises supply and installation of the wind power plant including VestasOnline™ SCADA system and a long-term maintenance and service agreement.

The project will be installed near Zajaczkowo in the north-western part of Poland. With a total output of 48 MW, the project will become one of the largest wind power plants in Poland. Delivery of the turbines will start in November 2007 with commissioning scheduled for the first half of 2008.

Mitsui and J-Power are well acquainted with Vestas and they both have several Vestas turbines currently operating in Japan.

“The Zajaczkowo wind power project is very important to Vestas Northern Europe due to the significant size of the project and the use of the highly efficient V80-2.0 MW wind turbines,” says Klaus Steen Mortensen, President of Vestas Northern Europe A/S and continues: *“The Polish market is an emerging market and it is very encouraging to see several projects materializing. We look forward to continuing our good cooperation with Mitsui and J-Power on the Zajaczkowo wind power project and future projects.”*

The wind power plant will have an estimated electricity production of 107 GWh per year which corresponds to an annual emission saving of approximately 58,500 tonnes of CO₂.

Any questions in relation to the order may be addressed to Mr Klaus Steen Mortensen, President of Vestas Northern Europe A/S, telephone +45 97 30 00 00.

Yours sincerely
Vestas Northern Europe A/S
