Vestas receives order for V90-3.0 MW turbines in Canada

TransAlta has placed an order for 22 units of the V90-3.0 MW wind turbine to be installed at an expansion of its Summerview wind farm. Vestas will supply and commission the wind turbines with delivery and commissioning scheduled for the second half of 2009. The order includes a five-year service and maintenance agreement.

The 22 wind turbines for the Summerview expansion will be installed adjacent to the original site near Pincher Creek in southern Alberta, Canada. The expansion will add another 66 MW of wind generating capacity to the existing 39 units of the V80-1.8 MW turbine supplied by Vestas.

With a total of more than 1,800 MW of wind generating capacity, Canada was the world's 11th largest nation in terms of installed wind capacity in 2007. Alberta accounted for over 500 MW of the total installed capacity, ranking the province as one of the leading Canadian provinces in wind development. Alberta Electric System Operator is constructing significant transmission upgrades to further increase the amount of wind to be connected to the grid in southern Alberta.

"The expansion of the Summerview wind farm is yet another example of how the wind industry can help meet the growing demand for energy, spur economic development and, at the same time, help combat climate change through the installation of clean, renewable and emissions-free wind generating capacity," says Jens Søby, President of Vestas Americas A/S. *"It is a great pleasure for Vestas to once again partner with TransAlta in the development of Canada's excellent wind resources."*

TransAlta, headquartered in Calgary, Alberta, is among Canada's largest non-regulated power generation companies. With the Summerview expansion, TransAlta has a total of 380 MW of wind-generated capacity in its portfolio which makes it one of Canada's largest generators of wind power.

Any questions in relation to the order may be addressed to Jens Søby, President of Vestas Americas A/S, telephone +1 503 327 2000.

Yours sincerely
Vestas Americas A/S
