Vestas' ground breaking ceremony for a new controller factory in Tianjin, China

Vestas has today celebrated its ground breaking ceremony for a new controller factory in Tianjin, China. At present, Vestas has four production units producing control systems, three of them located in Denmark and one in Spain.

The establishment of the new controller factory is part of a long-term investment to meet the massive growth within the wind turbine industry and plays an important role in Vestas' global production footprint. The choice fell on exactly this prosperous location because of the many advantages which China has to offer. Besides, Tianjin has a long tradition within Vestas' line of business.

"Vestas has an excellent cooperation with the TEDA Government as well as with other business partners in the area. We believe in the positive development of the Chinese market, and this investment reconfirms our commitment to the Chinese market and the region", says Thorbjørn N. Rasmussen, President of Vestas Asia Pacific A/S.

The new factory will offer world-class training and education for approx 250 local employees, and the production facilities will cover approx 15,000 square metres. The new factory in Tianjin will focus on the production of control panels, high power racks as well as cable production. The first control panel will leave the factory in May 2009. Vestas will start producing control systems for its V80 wind turbine, and production of control systems for its V52 wind turbine will start at a later stage.

"The overall strategy for the establishment of Vestas' controller factory in China is based on our conviction that it is essential to follow the global market development and demands. Our aim is simply to provide world-class manufacturing of control panels and to further establish our presence - now in the Chinese market place. Therefore, a controller factory in China is a vital step in order to fulfil our strategic goal," concludes Bjarne Ravn Sørensen, President of Vestas Control Systems A/S.

Any questions in relation to the establishment of Vestas Control Systems' new factory in Tianjin, China, may be addressed to Bjarne Ravn Sørensen, President of Vestas Control Systems A/S, telephone +45 9730 3400, or to Thorbjørn N. Rasmussen, President of Vestas Asia Pacific, telephone +65 6303 6501.

Yours sincerely
