Vestas receives order for 10 V90-3.0 MW turbines in Aruba, the Netherlands Antilles

Vestas has received an order for delivery of 10 units of V90-3.0 MW wind turbines for Wind Park "Vader Piet" in Aruba (Netherlands Antilles) from Hutting Windenergy and Bright Capital Partners. The contract includes supply, installation and commissioning. Delivery of the wind turbines will start in the third quarter of 2009 and the commissioning is planned for the beginning of 2010.

"This project is very special to us, caused by its extraordinary and exotic location. The transport to Aruba will take place by dedicated sea transport. Due to limited availability of heavy transport and crane facilities on the island, the transportation includes the necessary cranes and trailers as well as the turbines, towers etc. We are very proud that Hutting Windenergy and Bright Capital Partners have chosen to work with Vestas in the Netherlands Antilles. After several successful projects in the Netherlands, this means a large step forward in our fruitful relationship," says Hans Vestergaard, Managing Director, Vestas Benelux B.V.

Hutting Windenergy and Bright Capital Partners are of the opinion that Vestas has proved to be a real partner during the development of the project and Eksport Kredit Fonden - EKF's involvement in getting the project financed. *"That was a great help to us as the financial markets have deteriorated significantly over the past few months,"* concludes Henk Hutting.

"The project has received support from EKF, and we are very satisfied with the active role that EKF has played in closing this project financially," says Hans Vestergaard.
