

## **Local Press Release No. 1/2008 from Vestas Mediterranean A/S**

Barcelona, 22 January 2008  
Local Press Release No. 1/2008  
Page 1 of 2

### **Vestas receives orders for a total of 54 MW for the Spanish market**

Vestas has received two orders for a total of 27 wind turbines for two projects in Spain. Elecnor has placed an order for 15 units of the V90-2.0 MW wind turbine for the Lezuza project, and Isolux Ingeniería, S.A. has placed an order for 12 units of the V80-2.0 MW turbine for the Cova da Serpe project. Both contracts include supply, installation, commissioning, a VestasOnline™ Business SCADA solution as well as a five-year service contract.

#### **15 turbines for Elecnor**

Elecnor is one of the leading Spanish groups in the area of promotion and integrated project management and infrastructures development. The Lezuza project will be located in the province of Albacete in the region of Castilla la Mancha. The owner will be Elecdey Lezuza S.A., a Spanish wind power plant developer.

#### **12 turbines for Isolux Ingeniería, S.A**

Isolux Ingeniería, S.A. belongs to the Isolux Corsán Group, one of the major Spanish groups dedicated to construction, engineering, concessions, services and energy. The 12 V80-2.0 MW turbines for the Cova da Serpe project will be located in the province of Lugo in the region of Galicia.

*"We are very satisfied with these new orders that reinforce the commitment Vestas has developed with the two main regions in Spain as regard wind energy, and we look forward to strengthening our position in the regions,"* says Javier Rodriguez, General Manager of Vestas Eólica S.A.U.

As of July 2007, Galicia and Castilla la Mancha had a total installed wind capacity of 2,712.38 MW and 2,614.86 MW, respectively, representing more than 40 per cent of the total installed capacity in Spain. In July 2007, Spain had a total installed wind capacity of 12,800 MW and a target of 25,155 MW installed by 2010, 35,000 MW by 2020 and 44,000 MW by 2030, including 8,000 MW installed offshore.

The Lezuza and the Cova da Serpe wind power plants will annually save the environment from approx 55.500 and 49.500 tons of CO<sub>2</sub>, respectively. The total production of both wind power plants will provide enough electricity to power approx 39,000 Spanish households.

Delivery of the wind turbines is scheduled to start in September 2008 for the Cova da Serpe project and in December 2008 for the Lezuza project. Commissioning is expected in February and end of June 2009, respectively.

**Vestas Eólica S.A.U.**

Vestas has been operating in the Spanish market since the 1980's. Located in Barcelona, Madrid and Zaragoza, Vestas Eólica S.A.U. is the Spanish company of Vestas, responsible for sales, installation, service and maintenance of wind power plants. In total, Vestas employs more than 700 people in Spain.

To ensure proximity to its clients, Vestas operates two nacelles production facilities in Viveiro (Lugo) and Villadangos del Páramo (León) and a control systems production in Ólvega (Soria). Vestas is also in the process of establishing a blade factory in Castilla La Mancha which will be put into operation during 2008. Finally, Vestas has a customer service centre in La Muela, Zaragoza and two service and maintenance centres in Zaragoza and La Coruña.

Vestas Eólica has been awarded ISO 9001 and OHSAS 18001 certifications and is constantly striving for high quality standards to be respected and applied.

Any questions in relation to the orders may be addressed to Mr Javier Rodríguez, General Manager of Vestas Eólica, telephone +34 91 567 0051, or to Mr Juan Araluce, President of Vestas Mediterranean A/S, telephone +34 93 241 9800.

Yours sincerely

**Vestas Mediterranean A/S**
