Vestas secures its fourth announced order in China this year

Vestas has received a 50 MW order from Hebei Fengning Construction Investment New Energy, its fourth announced order in China this year.

The order is for 25 V90-2.0 MW turbines for the HECIC Fengning Senjitu Wind Farm Phase II project. Delivery and commissioning is expected at the end of this year. The contract includes supply of the turbines as well as a VestasOnline® Business SCADA solution and a two-year Active Output Management (AOM) 4000 service agreement.

Hebei Fengning Construction Investment New Energy has 10 years of experience with wind energy and has currently placed orders with Vestas amounting to 320 MW, including the HECIC Fengning Senjitu order.

Vestas installed its first wind turbine in China in 1986. Since then, Vestas has introduced a full suite of turbine and service products for China’s low- and medium-wind sites and remains fully committed to the world’s largest wind energy market.

“Hebei Fengning Construction Investment New Energy placed its first order with Vestas seven years ago, and we are very pleased that the company has now chosen to place its sixth order with us”, says Chris Beaufait, President of Vestas Asia Pacific & China. “We expect that China will remain the largest onshore market, and we have a strong foundation for improving our regional competitiveness and presence in the country”, Beaufait says.

About Vestas
More than 1,900 dedicated Vestas employees provide high-quality wind energy solutions to millions of homes in China. Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 53,700 wind turbines worldwide currently reduces carbon emissions by over 60 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 73 countries, providing jobs for around 19,700 passionate people at our service and project sites, research facilities, factories, and offices all over the world. With 52 percent more megawatts installed than our closest competitor and more than 66 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
