Vestas secures 40 MW order in Italy

Vestas strengthens its market position in Italy with a 40 MW wind project to be located in the southern region of Basilicata, Italy.

Vestas has received a firm and unconditional order for 12 units of the V112-3.3 MW wind turbine for the Cancellara wind project in the southern province of Basilicata, Italy. The 40 MW order for has been placed by Eolica Cancellara SRL, a subsidiary of Energreen Holding Italia Spa, which is part of a Luxembourg investment entity operating in the clean energy market.

The order comprises the supply, electrical works and installation of the wind turbines, including the electrical infrastructure of the wind farm, as well as a 10-year Active Output Management (AOM) 5000 service agreement. Delivery of the wind turbines is scheduled for the fourth quarter of 2015, with commissioning planned for the first quarter of 2016.

Upon completion, the Cancellara wind power plant is expected to produce about 100,440 MWh annually, which corresponds to the residential electricity consumption of approximately 116,000 people in Italy. The V112-3.3 MW wind turbine is a variant of Vestas’ 3 MW platform aimed at improving energy production on high-wind sites.

"We have been present in Italy since 1991 and have installed almost 3.5 GW of wind power capacity in the country. We are pleased to partner for the first time with Energreen to take the Italian wind energy sector one step further. We look forward to a close collaboration from the earliest stages of the project through to completion", says Marco Graziano, President of Vestas Mediterranean.

About Vestas
Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 54,200 wind turbines currently reduces carbon emissions by over 60 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 73 countries, providing jobs for around 18,200 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 percent more megawatts installed than anyone else in the industry and close to 68 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
