News release from
Vestas Asia Pacific and China

Beijing, 22 July 2015

Vestas wins 46 MW project in India
Vestas has received a firm and unconditional order for 23 V110-2.0 MW turbines for a wind power plant in the Indian State of Karnataka.

The project, which is expected to power approximately 100,000 Indian households, includes a 15-year Active Output Management (AOM) 5000 service contract, in which Vestas guarantees a defined level of availability and performance. The project also includes the supply of foundations and SCADA Vestas Business Online for data-driven monitoring and preventive maintenance.

Delivery and commissioning are expected during the second quarter of 2016. Vestas will be responsible for the supply and installation of the wind turbines.

“We are very pleased with this order. It proves the strength of the V110-2.0 MW and Vestas’ strong service set-up in the Indian market,” says Jorn Hammer, Vestas Senior Vice President and Head of India.

At the customer's request, additional project details are not being disclosed.

About Vestas
Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 54,200 wind turbines currently reduces carbon emissions by over 60 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 73 countries, providing jobs for around 18,200 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 percent more megawatts installed than anyone else in the industry and close to 68 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
