Vestas to supply wind project in India

Vestas has received a firm and unconditional order for 20 V110-2.0 MW turbines for a wind power plant in Gujarat State, India.

The order for the Khambaliya project is an extension of an existing contract with Powerica Ltd., a rising power solutions provider in India. Among the 40 MW for this project, 12 MW constitutes an upgrade from a part of a previous order for turbines with the V100 platform, and the remaining 28 MW is newly added.

The order includes the supply, installation and commissioning of the turbines, which is expected to be completed in the second quarter of 2016, as well as a five-year service contract for Vestas' premium service package, the Active Output Management (AOM) 5000, in which Vestas guarantees a defined level of availability and performance. The V110-2.0 MW turbine is the latest addition to Vestas’ 2 MW-platform and is well-suited for the low-wind sites in India.

"This contract with Vestas will enhance our wind power portfolio. Vestas is a trusted partner and we will continue to work with them to expand this relationship even more", says Naresh Oberoi, Chairman of Powerica.

Jorn Hammer, Head of Vestas India, adds, “We are strengthening our operations in India, and this order confirms we are on the right track and making good progress. We look forward to working with Powerica to deliver a top-performing wind energy power plant”.

About Vestas
Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 54,900 wind turbines currently reduces carbon emissions by over 60 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 74 countries, providing jobs for around 18,800 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 percent more megawatts installed than anyone else in the industry and more than 69 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
