Vestas wins 33 MW turbine order in Sweden

Allianz Capital Partners has placed an order with Vestas for the Mombyäsen project in Sweden. The order takes Vestas’ firm order intake on the V126-3.3 MW in Sweden close to 200 MW.

The order for the Mombyäsen project comprises 10 V126-3.3 MW turbines and includes delivery, installation and commissioning of the turbines as well as a 10-year Active Output Management (AOM) 5000 service agreement. Delivery of the turbines is expected to take place in second quarter of 2016, with commissioning expected to start in third quarter of 2016.

Allianz Capital Partners is the Allianz Group’s in-house investment manager for alternative investments. With a combined generation capacity of more than 1,200 MW, it is one of the world's largest financial investors in renewable energy. Arise AB, a well-established developer with a large portfolio primarily in Sweden, has developed the Mombyäsen project and will manage the construction of the wind power plant.

“We are very pleased to further strengthen our position in the Swedish wind market by acquiring the Mombyäsen project – our fourth wind park in Sweden”, said David Jones, Head of Renewable Energy at Allianz Capital Partners. “We are looking forward to working with both Arise and Vestas to ensure the smooth construction and optimal long-term operation of the asset”.

“We look forward to working with our key supplier Vestas to bring yet another wind power project to the Swedish market. Vestas has competitive technology, comprehensive capabilities within service and foremost the lowest cost of energy over the lifetime of the project”, says Peter Nygren, CEO at Arise AB.

“We appreciate our partnership with both Allianz and Arise, and we thank them for choosing Vestas’ state-of-the-art technology with the lowest cost of energy. We look forward to a close collaboration from the earliest stages of the project through to completion and operation”, says Klaus Steen Mortensen, President, Vestas Northern Europe.

About Vestas
Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 54,900 wind turbines currently reduces carbon emissions by over 60 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 74 countries, providing jobs for around 18,800 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 percent more megawatts installed than anyone else in the industry and more than 69 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
