Vestas receives another order in China

**Following last week’s 200 MW order, Hanas Group has placed a 50 MW order for 25 V110-2.0 MW turbines.**

Hanas Group has placed a firm and unconditional order of 25 V110-2.0 MW turbines for the Wanglejing Nuijijuan wind park in western China’s Ningxia Hui Autonomous Region with delivery and commissioning expected in the second quarter of 2016.

With the order, Hanas Group has purchased a total of 850 MW of Vestas turbines, underlining the strong partnership between the two companies that share a strong focus on the levelised cost of energy for the turbines’ entire lifecycle.

"In our long cooperation, Vestas has continuously showed global leadership on technology and service capabilities within the wind power industry, and we have thus been impressed by the performance of Vestas’ products and the quality of Vestas’ operation and maintenance", said Ma Fuqiang, President of Hanas Group.

"We are moving forward in China with our strategy for the market being on track. The orders we have received recently are a testament to this", said Chris Beaufait, President of Vestas Asia Pacific and China. “We are proud of the continuous trust Hanas puts in Vestas and our ability to provide the lowest cost of energy across the turbines’ entire lifecycle, based on our world-class technology and operations and maintenance practices”.

The order includes a two-year Active Output Management 4000 service contract in which Vestas guarantees a defined level of availability and performance, and SCADA VestasOnline Business for data-driven monitoring and preventive maintenance.

About Vestas

Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 55,700 wind turbines currently reduces carbon emissions by over 60 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 74 countries, providing jobs for more than 19,500 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 percent more megawatts installed than anyone else in the industry
and more than 71 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
