Vestas receives 48 MW order in China
The order for 24 Vestas V110-2.0 MW wind turbines was placed by long-time customer China Longyuan Power Group Corporation

China Longyuan Power Group Corporation has the largest installed wind capacity in China. Its Vice General Manager, Huang Qun, says that “We decided to work with Vestas once again on this project, based on our previous experience with their turbines’ reliability on our many diverse wind sites – and we are of course expecting this project to be another successful cooperation”.

The order includes a three-year Active Output Management 4000 service contract, in which Vestas guarantees a defined level of availability and performance, and a SCADA VestasOnline Business for data-driven monitoring and preventive maintenance. Delivery and commissioning of the turbines are expected in the last quarter of 2016.

“As we celebrate Vestas’ 30th anniversary in China this month, we are pleased to build on our long-term partnership with Longyuan, and we believe that this new order once again emphasises that Vestas is a valued partner for our Chinese customers”, says Chris Beaufait, President of Vestas Asia Pacific and China.

In 2015, China accounted for about half of the world’s wind power installation. Since the erection of three Vestas turbines in 1986, which made up China’s first ever wind farm, Vestas has been deeply involved in the country’s wind power industry development. The three Vestas turbines ran well for 29 years until being retired in 2015.

About Vestas

Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 57,300 wind turbines currently reduces carbon emissions by over 82 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 75 countries, providing jobs for around 21,500 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 50 percent more megawatts installed than anyone else in the industry and over 75 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
