News release from  
Vestas Mediterranean 

Madrid, 27 June 2016 

Vestas wins 26 MW order in Greece 

The project will consist of eight V112-3.3 MW turbines and is CNI S.A’s first order with Vestas. 

The firm and unconditional order placed by CNI S.A is for a 26 MW wind park to be located in the Arcadia region in southern Greece. The contract comprises supply and installation of the wind turbines as well as a 15-year AOM 4000 service agreement to guarantee and optimise performance of the wind turbines. Turbine delivery is planned for the first quarter of 2017, whilst commissioning is expected in the second quarter of 2017. 

According to Marco Graziano, President of Vestas Mediterranean, “This order is the result of a partnership with CNI S.A that has been evolving for the last five years and on which we look forward to continue building going forward. Vestas has been active in the Greek market for more than 10 years and will continue to be so in the years to come”. 

Nikos Konstantopoulos, President of CNI S.A. says that “The Vestas Hellas team did well to find common ground and solutions during negotiations, and we are confident that project execution will also be carried out in the same spirit. The V112-3.3 MW Vestas model meets our expectations, and since we will continue to invest in the wind energy sector in Greece, we look forward to a long and fruitful co-operation with Vestas for projects to come”. 

Vestas has delivered more than 1.1 GW of wind power capacity to Greece.

About Vestas 

Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 57,300 wind turbines currently reduces carbon emissions by over 82 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 75 countries, providing jobs for around 21,500 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 50 percent more megawatts installed than anyone else in the industry and over 75 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
