Vestas wins 76 MW order in Sweden
Rabbalshede Vind has ordered 22 Vestas V126-3.45 MW turbines for the Lyrestad wind park with Google buying the power output.

Rabbalshede Vind 5 AB, a joint venture between Rabbalshede Kraft AB and private investment company Ardian, has placed a firm and unconditional order for the Lyrestad wind park in Mariestad, Sweden. Google will purchase the power produced by the wind park.

“Working with Vestas on the Lyrestad wind park feels like a secure and natural choice. Vestas’ support and flexibility during the development of the project, the performance of the V126-3.45 MW turbine, and the optimal service package are the main reasons behind our decision to once again rely on Vestas as our turbine and service supplier”, says Peter Bjelkengren, Purchasing and Construction Manager at Rabbalshede Kraft.

Klaus Steen Mortensen, President at Vestas Northern Europe, adds that “It is a great pleasure for Vestas to be part of this project, where we once again prove our ability to deliver a strong business case for investments in wind energy. Whether companies look to power their own operations, reduce supply risk and price volatility, or contribute to combatting climate change, investing in wind energy simply makes economic sense”.

The order includes supply, installation, and commissioning of the turbines as well as a 10-year Active Output Management service agreement (AOM5000). Turbine delivery is expected to begin in the second quarter of 2017, with commissioning expected to start in the third quarter of 2017.

About Vestas
Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 57,300 wind turbines currently reduces carbon emissions by over 82 million tons of carbon dioxide every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 75 countries, providing jobs for around 21,500 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 50 percent more megawatts installed than anyone else in the industry and close to 75 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
