### Vestas receives 102 MW order in California, USA

With reference to Vestas Wind Systems A/S' company announcement No. 19/2011 of 6 May 2011, Vestas has received a 102 MW order for 34 V90-3.0 MW turbines for a wind-energy project in Tehachapi, California, USA, owned by Brookfield Renewable Power ("Brookfield") and Coram California Development Management, LLC ("CCDM").

The contract includes delivery and commissioning along with a two-year service and maintenance agreement. Delivery is scheduled for the second half of 2011 and commissioning is expected in late 2011.

*"We look forward to working with Brookfield and Coram to bring cost-effective, predictable and clean wind energy to California," said Martha Wyrsh, President of Vestas Americas. "The V90-3.0 MW is designed to operate in areas of medium-to-high winds, so it is the ideal turbine for this site."*

This project will provide direct and indirect economic benefits to Kern County with long-term jobs and property-tax revenues generated from the turbines.

*"This high-quality wind-power project complements our strategy of expanding our renewable power presence in California," said Kim Osmars, COO of Brookfield Renewable Power's U.S. Operations. "This order represents an important project milestone, and completion of the facility is expected to bring Brookfield's North American wind portfolio to more than 600 megawatts of installed capacity by the end of 2011."*

Brookfield recently began construction of the Granite Reliable Wind Project in New Hampshire, which is using 33 V90-3.0 MW turbines from Vestas.

Once this California project is finished, Vestas will have 1,255 MW of its industry-leading wind turbines throughout the state.

*"Coram has been working on this development for several years and is proud to be working with Brookfield and Vestas to finally bring it to market," said Brian O'Sullivan, President of CCDM. "We look forward to doing future projects with both Brookfield and Vestas."*

**About Vestas**

Vestas is the world leader in supplying high-tech wind power systems, and the preferred provider of wind turbines, services and solutions in North America. Since 1979, Vestas has supplied more than 43,000 wind turbines in 66 countries. Vestas sold its first wind turbine in North America in 1981 and since has supplied more than 11,000 turbines to the United States and more than 1,000 to Canada. The company's North American manufacturing operations are based in Colorado. This includes a blade factory in Windsor, a nacelle factory in Brighton and a tower factory — the world's largest — in Pueblo. Vestas also has research and development offices in Texas, Massachusetts and Colorado. Vestas' global headquarters is in Randers, Denmark. For additional information visit Vestas' website at [www.vestas.com](http://www.vestas.com).

**About Brookfield Renewable Power**

Brookfield Renewable Power Inc., wholly-owned by Brookfield Asset Management Inc., has more than 100 years of experience as an owner, operator and developer of hydroelectric power facilities. Its total portfolio includes more than 170 generating facilities with over 4,300 megawatts of capacity. It also has a significant hydroelectric and wind project pipeline. Brookfield Renewable Power's operations are primarily located in North America and Brazil. Brookfield Asset Management Inc., focused on property, power and infrastructure assets, has over US\$ 100 billion of assets under management and is listed on the New York and Toronto Stock Exchanges under the symbols BAM and BAM.A, respectively, and on Euronext Amsterdam under the symbol BAMA. For more information, please visit Brookfield Renewable Power's website at [www.brookfieldpower.com](http://www.brookfieldpower.com) and Brookfield Asset Management's website at [www.brookfield.com](http://www.brookfield.com).

**About Coram California Development Management, LLC**

Coram has been operating wind turbines in the Tehachapi Pass since 1984. The Vestas project raises the total installed capacity of projects Coram and its principals have developed in Asia, Europe and North America to over 2,500 MW. Coram is a privately held organization with offices in British Columbia and Southern California. For additional information visit Coram's website at [www.coramenergy.com](http://www.coramenergy.com).
