News release No. 1/2012

Expertise creates added value for customers – Vestas at Hanover fair 2012

Global wind energy leader Vestas will actively participate at this year's Hanover industry fair.

Vestas is the only global wind energy solutions provider delivering peace-of-mind to our customers along the entire wind energy value chain, from siting to power plant optimisation and everything in between. At the fair, we will provide insight into our enlarged product portfolio and the customer focused reorganisation of our business.

As Hanover Fair is a major industry event, Vestas will also be providing a global perspective on the German and European wind energy sectors through participation in presentations, workshops and panels – such as the BWE panel on Wednesday, 25 April.

Vestas will have a 240 m² booth at the exhibition (hall 27, stand L24) in the “Energy” area, staffed by Vestas employees who will be pleased to discuss our products and services with visitors. Guests to the booth will be able to attend presentations held by Vestas employees on a variety of topics in our cinema. Interested guests can find out about our latest products, such as the V112-3.0 MW and the 2 MW platform, as well as our service portfolio and the Vestas Diagnostic and Performance Centre (VPDC), which guarantees excellence in the analyses and remote monitoring of data from our wind turbines.

These topics and others will be on the agenda while Vestas welcomes customers, government officials and other stakeholders to the booth during Hanover Fair.

About Vestas

Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas' more than 46,000 wind turbines currently reduces carbon emissions by approximately 55 million tons of CO₂ every year, while at the same time building energy security and independence.

Today, Vestas has delivered wind energy in close to 70 countries, providing jobs for over 20,000 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 66.9 per cent more megawatts installed than our closest competitor, Vestas is the world leader in wind energy.
