Vestas signs 51 MW order in Poland

Vestas has received an order for 17 units of the V112-3.0 MW turbine for Poland. The contract comprises supply, installation and commissioning of the turbines as well as a 12-year service and maintenance agreement with the solution AOM 5000 (Active Output Management), which is Vestas' new service product optimising wind power plant output and minimising customer risk.

Delivery of the turbines is expected to start in Q3 2012 and the project is expected to be completed by the end of 2012.

At the customer's request, additional details about the customer and the project location cannot be disclosed at this time.

About Vestas

Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas' more than 44,500 wind turbines currently reduces carbon emissions by approximately 50 million tons of CO₂ every year, while at the same time building energy security and independence. Today, Vestas has installed turbines in 66 countries, and for our own operations alone we provide jobs for over 20,000 passionate people at our service and project sites, research facilities, factories and offices all over the world.
