

News release from Vestas Asia Pacific & China

Beijing, 24 October 2014

Vestas receives a 50 MW order in China

Vestas has received a firm and unconditional order from Hanas, for a total capacity of 50 MW. This is the fourth order from Hanas in 2014.

The Hanas order features 25 V100-2.0MW turbines to be installed in Ningxia, a province in the northwest of China, during the second quarter of 2015.

President of Vestas Asia Pacific and China, Chris Beaufait, says: *"We celebrate yet another order from long-time Vestas partner Hanas – the fourth order they have placed with us this year. We have been working closely with Hanas for several years to provide them with products and solutions to match their on-site wind conditions and maximize their energy output."*

Hanas is a privately held Chinese investment company. With today's order, Vestas has secured firm and unconditional orders with Hanas totalling 600 MW since the first project in 2009, of which 200 MW have been secured in 2014.

President of Hanas, Mr. Ma Fuqiang, says: *"We have a strong commitment to wind energy, and we are looking for a long-term trusted partner who can help us achieve a good return on investment. That is why we have been partnering with Vestas for the past five years, and we are glad to continue our great collaboration."*

The delivery of the 25 V100-2.0MW turbines will begin in March 2015, with installation expected to be completed in the second quarter of 2015. The order includes installation and commissioning supervision, a Vestas Online® SCADA system and a two-year AOM4000 service agreement.

About Vestas

Vestas installed its first wind turbines in China in 1986. More than 1,900 dedicated Vestas employees provide high-quality wind energy solutions to millions of homes in China. The company's largest global integrated manufacturing complex is located in Tianjin, China, producing generators, blades, nacelles, hubs and control systems. As of June 30, 2014, Vestas has installed more than 4,300 MW in China.

Globally, Vestas has installed more than 52,000 wind turbines, reducing carbon emissions by over 60 million tons of CO₂ every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 73 countries, providing jobs for around 17,500 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 per cent more megawatts installed than our closest competitor and more than 62 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
