Vestas receives 33 MW order for first V126-3.3 MW turbines in Austria

smart-energy Betriebs GmbH orders 10 V126-3.3 MW turbines for a wind power plant in Lower Austria.

Vestas is pleased to announce a firm and unconditional order for 10 V126-3.3 MW turbines from smart-energy Betriebs GmbH for their wind power plant Hohenrappersdorf II. The turbine delivery is expected to start in the fourth quarter of 2015 and commissioning is planned for the second quarter of 2016.

The contract includes supply, installation, foundation works and commissioning of the turbines, along with a VestasOnline® Business SCADA solution and a 20-year full-scope service agreement (AOM 4000).

“Based on its large rotor diameter, the V126 is best suited for harvesting medium- to low-wind sites”, says Martin Blochberger, Managing Director of smart-energy Betriebs GmbH. “Vestas’ offering from the product economics to the product quality, the trust in Vestas project execution staff up to the customer friendly service package are all well-suited to our needs”.

“We are very pleased with being selected as the supplier and long-term service partner on the 33 MW Hohenrappersdorf II project”, states Dr. Christoph Vogel, President of Vestas Central Europe. “The V126-3.3 MW is an excellent choice for delivering a strong business case for customers with wind power plants at medium- and low-wind sites.”

About Vestas

Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 53,700 wind turbines currently reduces carbon emissions by over 60 million tons of CO₂ every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 73 countries, providing jobs for around 19,700 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 per cent more megawatts installed than our closest competitor and more than 66 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.

The headquarters of Vestas Central Europe is located in Hamburg, Germany. The business unit is responsible for the sales and marketing of wind power systems as well as for the installation and operation of wind power plants in Germany, Benelux, Austria, Russia, Eastern Europe and Southern and Eastern Africa.
