Malmö, 15 December 2015

Vestas signs first full scope lifetime service agreement in Poland

Vestas has won a 146 MW 14-year service renewal agreement covering four Polish wind parks.

Servicing Vestas turbines, the full scope lifetime agreement is the first of its kind in the Polish market and extends the existing service agreement from six to 20 years.* Vestas will serve as the on-site service asset manager with responsibility for 24/7 surveillance, reporting to the customer, and delivery of services according to our AOM 4000 service package.

“This order demonstrates once again Vestas’ ability to tailor its traditional service offerings to match our customers’ needs, including a complete asset management solution and the first full scope lifetime service contract in Poland”, says Jan From, Vice President for Service in Vestas Northern Europe.

Vestas is the largest maintenance provider in the industry with more than 15 percent of the worldwide wind turbine fleet under service. Every day, Vestas’ more than 6,000 service employees turn 35 years of experience into tangible, value-adding service experiences for our customers around the world.

* Customer and project names not disclosed at the customer’s request.

About Vestas

Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 55,000 wind turbines currently reduces carbon emissions by over 60 million tons of carbon dioxide every year, while at the same time building energy security and independence.

Vestas has delivered wind energy in 74 countries, providing jobs for around 19,600 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 percent more megawatts installed than anyone else in the industry and more than 71 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
