Vestas receives its first order in Poland in 2016

Vestas continues its momentum in Poland with a 56 MW order placed by Energix Renewable Energies Ltd. for the extension of the Kozielice wind park.

Vestas is further strengthening its leading position in the important northern European Polish market, winning a firm and unconditional order for 18 V100-2.0 MW and 10 V110-2.0MW wind turbines for the Kozielice II wind park. The order is placed by Wiatromil Sp. z o.o. a fully owned subsidiary of Energix-Renewable Energies Ltd.

The order includes delivery, installation, and a 15-year Active Output Management (AOM) 5000 service agreement. Commissioning is expected to be finalised by the end of the second quarter of 2016.

Asa Levinger, CEO of Energix, said *“Based on our previous experience with Vestas, we value the high product quality and reliability of Vestas’ 2 MW platform as well as Vestas’ track record for on-time installations. We are pleased to further strengthen our relationship with Vestas for this project and potentially for other projects of Energix Group in Poland and in other places”.*

“We are very pleased to carry our momentum into 2016 with the order for Kozielice II. In 2015 we installed more than 750 MW of turbines in Poland while meeting strict project deadlines. This order shows that our customers continuously trust our ability to deliver a strong business case within a short period of time”. says Klaus Steen Mortensen, President, Vestas Northern Europe.

The Kozielice II wind farm is an extension of the 50 MW Kozielice wind farm, constructed in 2015 with turbines from Vestas’ 2 MW platform.

About Vestas

Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas’ more than 55,700 wind turbines currently reduces carbon emissions by over 60 million tons of CO₂ every year, while at the same time building energy security and independence. Vestas has delivered wind energy in 74 countries, providing jobs for around 19,600 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 52 per cent more megawatts installed than our closest competitor and more than 71 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
