

News release from Vestas-American Wind Technology

Portland, 17 May 2017

Vestas signs 15-year renewal of 150 MW service agreement with EverPower

The service agreement includes 50 V90-3.0 MW located in California and adds to Vestas' market-leading 73 GW of turbines under service.

Owned by EverPower and commissioned in 2012, the 150 MW Mustang Hills project has been under Vestas' service since commissioned. With the 15-year extension, the project will remain under Vestas' service until 2032.

The service agreement is a full-scope service package designed to maximize uptime, performance and energy production. The long-term extension renews the service agreement to cover the expected 20-year operational life of the project, ensuring maximum return on Everpower's investment.

"EverPower looks forward to continuing our relationship with Vestas through this 15-year full service agreement," said Andrew Golembeski, COO. "The extended agreement ensures stability of operating costs and comfort that our asset will be serviced and maintained to the highest standards."

Chris Brown, President of Vestas' sales and service division in the United States and Canada said: *"We have worked to ensure optimal performance of the Mustang Hills project since its commissioning, and EverPower's decision to extend the service contract for another 15 years underlines our ability to provide strong returns through our service offerings. We look forward to continue to optimize Mustang Hills' performance and profitability for its entire lifetime."*

Vestas has more than 35 years of experience in installing and maintaining wind turbines and currently has more than 73 GW of wind turbines under long-term service agreements globally, including 24.5 GW in North America.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.
