Vestas wins first V126-3.45 MW order in South Korea

Vestas has received a 21 MW order from new customer Serveone Co. Ltd., making South Korea the 18th market with V126-3.45 MW firm order intake.

The firm and unconditional order comprises six V126-3.45 MW turbines and is Serveone Co, Ltd.'s first wind power plant. Located on Jaeun Island in South Korea's Jeonnam province, the project will also be the first project in South Korea featuring V126-3.45 MW turbines. The order highlights how Vestas' global reach and flexible manufacturing setup ensure competitive product offering across the globe.

The order includes supply and supervision of installation as well as a 10-year Active Output Management 4000 (AOM4000) service contract in which Vestas guarantees a defined high level of availability and performance. It also includes the SCADA VestasOnline Business system for data-driven monitoring and preventive maintenance. Delivery is expected to start by the end of 2017.

"Vestas has been present in South Korea for more than 20 years and we are proud of our contribution to the Korean Government's goal of reducing carbon emissions through reliable clean power. The introduction of the V126-3.45M to South Korea demonstrates how we continuously improve the available technology, for the benefit of our customers and the South Korean energy industry," said Clive Turton, President of Vestas Asia Pacific.

Having installed the first commercial sized turbine in the country in 1995 and around 275 MW in total since then, Vestas has a long and proven track record in South Korea.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.
