

News release from Vestas Wind Systems A/S

Madrid, 06 June 2017

Vestas receives 48 MW order in Greece

The order adds to Vestas' 1.3 GW of installed capacity in Greece, reinforcing its market-leading position in the market.

Vestas has received a firm and unconditional order for the 48 MW Petalas wind park in the region of Aitolokarnania in western Greece. The order comprises 24 V100-2.0 MW turbines and was placed by Protergia S.A., a wholly-owned subsidiary of Mytilineos Holdings S.A.

The contract includes supply and installation of the wind turbines as well as a 10-year Active Output Management 4000 (AOM4000) service agreement to maximise energy production at all times. Delivery of the wind turbines is expected to begin in the fourth quarter of 2017.

"We are very happy to work once again, together with Vestas, on a large wind park in Greece. Petalas is the sixth consecutive cooperation between our companies, totalling 130 MW. Our continued cooperation clearly proves the trust we put in Vestas, as one of the main strategic partners of Protergia", claims Dinos Benroubi, CEO of Protergia.

"Protergia S.A. is a key customer and we are pleased to partner with them once again and reinforce our market-leading position in the country. Greece is increasingly betting on wind and with the efficient and reliable energy our solutions provide, Vestas is taking a key role in the country's transition to a sustainable energy mix", says President of Vestas Mediterranean Marco Graziano.

Vestas pioneered the Greek wind market in 1986 and has since then installed around 1.3 GW of wind turbines in Greece.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.
