

**News release from
Vestas Central Europe**

29 June 2017

Vestas receives orders totalling 33 MW in Austria

Vestas receives orders for 10 turbines from Energie Burgenland Windkraft GmbH and ImWind GmbH, highlighting the versatility of the 4 MW platform.

The firm and unconditional orders are for one project, the Parndorf wind park in eastern Austria. The Parndorf wind park highlights Vestas' 4 MW platform's versatility and employs a highly customised solution consisting of a mix of V126-3.3 MW and V112-3.3 MW turbines with hub heights of 137m and 140m.

The order includes supply and commissioning of the wind turbines and full-scope service agreements (AOM 4000) for 15 and 20 years respectively. The service agreements also include the VestasOnline® Business SCADA solution. Wind turbine delivery and commissioning are planned for the second half of 2017.

"Vestas has a highly versatile product portfolio that made it possible to develop a solution that is customised to the Parndorf wind park's specific characteristics. Together with Vestas proven track record of operational excellence and service capabilities, we are certain this project will be highly successful and strengthen our partnership further", state Thomas Huemer, Managing Director of ImWind GmbH and Wolfgang Trimmel, Managing Director of Energie Burgenland Windkraft GmbH.

"To achieve the lowest cost of energy at the Parndorf wind farm, we needed to leverage two different turbine variants installed with two kinds of towers. The team has done a great job to optimise the technology for this low wind site and I believe the wind solution will deliver superior annual energy production as a result of that", states Nils de Baar, President of Vestas Central Europe.

About Vestas

Vestas is the energy industry's global partner on wind power solutions. We design, manufacture, install, and service wind turbines across the globe, and with close to 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.

The headquarters of Vestas Central Europe is located in Hamburg, Germany. The business unit is responsible for the sales and marketing of wind power systems as well as for the installation and operation of wind power plants in Germany, Benelux, Austria, Russia, Eastern Europe and Southern and Eastern Africa.

Vestas is active in the Austrian market since 2000. Since then, the company has delivered close to 313 wind turbines, representing a total capacity of 617 MW to this market. Vestas Austria is the service partner for a portfolio of more than 957 MW in Austria and neighbouring countries such as Czech Republic, Hungary, Croatia and Romania. In 2005 Vestas opened an office in Vienna taking care of the Austrian wind market as well as of the neighbouring eastern European wind markets.
