

## News release from Vestas Asia Pacific

30 June 2017

### Vestas wins 54 MW order in Australia

*Tilt Renewables signs an engineering, procurement and construction contract for the 54 MW Salt Creek wind park in Victoria, taking Vestas' order intake in Australia to date to more than 2.5 GW.*

The firm and unconditional order for 15 V126-3.45 MW was placed by long-term customer Tilt Renewables for the Salt Creek wind park in Woorndoo, Victoria. The turbines will be delivered in Power Optimised Mode of 3.6 MW to maximise energy output.

The order includes a 25-year Active Output Management 4000 (AOM4000) service agreement in which Vestas guarantees a defined high level of availability and performance for the project's entire lifetime. It also includes the SCADA VestasOnline® Business system for data-driven monitoring and preventive maintenance.

*"We value the long standing relationship that we have enjoyed with Vestas and are very pleased for Vestas to be EPC contractor and long term O&M provider for the Salt Creek project which is Tilt Renewables' first wind farm investment since the demerger from Trustpower",* said Robert Farron, CEO Tilt Renewables.

*"Tilt Renewables is a long-term customer and to sign this EPC contract together with a 25-year service agreement shows the trust Tilt Renewables has in the solutions we are offering to the growing Australian market. Vestas has now signed more than 500 MW of orders in Australia since late 2016, which together with the recent announcement of our new 4 MW turbines position us well to continue delivering highly successful wind energy projects for our customers",* said Clive Turton, President of Vestas Asia Pacific.

Turbine delivery is expected in the first quarter of 2018, with commissioning in the third quarter of the same year.

The construction of the Salt Creek wind park is expected to take 12 months and will create more than 100 jobs.

#### **About Vestas**

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.
