

News release from Vestas-American Wind Technology

Portland, 30 June 2017

Vestas receives 200 MW order in the United States

The firm and unconditional order comprises 100 V110-2.0 MW turbines.

The order includes supply and commissioning of the wind turbines as well as a multi-year Active Output Management 4000 (AOM4000) service agreement, Vestas' full-scope service package maximizing uptime and energy production.

"Each turbine manufactured in this order will support 30 full-time jobs over its lifetime, all while delivering clean, low cost energy and millions in economic benefits to the host community and all the communities touched by Vestas' manufacturing supply chain which spans all 50 states," said Chris Brown, President of Vestas' sales and service division in the United States and Canada.

Delivery of the wind turbines is expected to begin in the first quarter of 2018, with commissioning expected in the fourth quarter of 2018.

With more than 36 GW installed in 45 countries on six continents since its debut, Vestas' 2 MW platform is the most widely installed platform in the industry.

Note that as the order became firm and unconditional in the second quarter local time in the USA, the order will be registered as second-quarter 2017 order intake.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.
