

News release from Vestas-American Wind Technology

Portland, 21 July 2017

Flat Top Wind I, LLC places order for 200 MW project in the U.S.

The order comprises 100 V110-2.0 MW turbines for the Flat Top wind project in Texas.

Vestas has received a firm and unconditional order in the U.S. from Flat Top Wind I, LLC, an indirect subsidiary of Alterra Power Corp., for the 200 MW Flat Top wind project located in central Texas. The order is their first order with Vestas in the U.S. and includes supply and commissioning of the turbines pursuant to a turbine supply agreement as well as a 10-year Active Output Management 5000 (AOM5000) service agreement, a full-scope service package designed to maximize uptime and energy production.

Delivery is expected to begin in the fourth quarter of 2017, with commissioning planned for the first quarter of 2018. Turbine components will be manufactured at Vestas' Colorado factories.

"With Flat Top Wind I, LLC's order and the transaction above, we are honored to partner with Alterra Power Corp. on our inaugural U.S. project together," said Chris Brown, President of Vestas' sales and service division in the United States and Canada, "Over the course of its lifetime, a single turbine creates 30 jobs, and with the Flat Top project we will once more demonstrate the economic benefits that wind energy delivers to both the local and state communities."

Vestas' 2 MW platform is the most widely installed platform in the industry, with more than 35 GW installed in 45 countries and six continents since its debut.

With more than 20,000 MW installed and 22,000 wind jobs, Texas leads the nation in wind energy deployment and employment, and produces more wind energy than the next three states combined.

About Vestas

Vestas is the energy industry's global partner on wind power solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.
