

News release from Vestas-American Wind Technology

Portland, 03 August 2017

Vestas receives 148 MW order in the U.S.

The order comprises 43 V126-3.45 MW turbines and a 20-year service contract for the Cactus Flats project in Texas.

Vestas has received a firm and unconditional order from Southern Power, a subsidiary of Southern Company. The order includes supply and commissioning of turbines as well as a 20-year service agreement designed to maximize uptime and energy production. Delivery is expected to begin in 2017, with commissioning planned for 2018.

"We are pleased to be part of Southern Power's growing wind portfolio," said Chris Brown, President of Vestas' sales and service division in the United States and Canada, "this order further expands our 4 MW footprint in North America, reaffirming both the versatility and proven ability of our platforms to deliver low-cost, reliable wind energy."

With more than 20,000 MW installed and 22,000 wind jobs, Texas leads the nation in wind energy deployment and employment, and produces more wind energy than the next three states combined.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.
