

## News release from Vestas Mediterranean

Madrid, 29 September 2017

# Mexican auctions produce more results for Vestas with new order for a wind park placed

Vestas continues to demonstrate its ability to support customers in submitting winning auction bids. In just four months, Vestas has received almost 600 MW in orders as a result of the auction held in Mexico last year, which accounts for 53 percent of the total wind capacity allocated.

As the latest example, Vestas has received an order for the supply and installation of 27 V136-3.45 MW wind turbines for a 93 MW wind park in the Northeastern state of Tamaulipas, Mexico.

*"With the order, Vestas' order intake from Mexico's energy auctions reaches almost 600 MW, which indeed highlights our strong market position and auction capabilities in this key market",* says Marco Graziano, President of Vestas Mediterranean.

The contract, derived from the second Mexican auction held last year, includes the supply and installation of the wind turbines as well as a short-term Active Output Management (AOM5000) service contract. Delivery of the wind turbines is expected for the third quarter of 2018, whilst commissioning is planned for 2019.

*"With more than 300 MW of installed capacity, the state of Tamaulipas is leading wind energy production in Mexico. Vestas has more than 700 MW installed or under construction in the state, including the largest wind park to be built in Mexico, also in Tamaulipas. Mexico is a key market for Vestas and our long-term localisation strategy to manufacture our V136-3.45 MW blades in Tamaulipas is pivotal to our strong offering in the market",* highlights Angélica Ruiz Celis, Vestas' Managing Director for Mexico and Northern LATAM.

Vestas pioneered the Mexican wind energy market back in 1994 when it installed the first commercial wind turbine in the country. Vestas has more than 1.5 GW of wind turbines either installed or under construction in Mexico.

### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with close to 85 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 71 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,500 employees are bringing the world sustainable energy solutions to power a bright future.
