

## News release from Vestas-American Wind Technology

Portland, 24 October 2017

# Vestas receives first order for V136-3.45 MW in the United States

Vestas has received a firm and unconditional order in the U.S. for 136 MW of turbines including both the 2 MW and 4 MW platforms. The order marks the introduction of the V136-3.45 MW wind turbine in the United States, which is especially well suited for the many mid- and low-wind sites across the country.

Emphasizing the broad range of Vestas' product portfolio, the project includes V136-3.45 MW turbines in Power Optimized Mode to 3.6 MW, as well as V110-2.0 MW turbines. The project, which includes previously purchased PTC components, has a total size of 150 MW and consists of 47 turbines.

Between the 2MW and 4MW platform, Vestas now has the unique market versatility to support wind projects the U.S. in a broad variety of wind regimes.

*"We're proud to announce our first full V136 order in the U.S., which underscores the strong fit and versatility of Vestas' powerful 4 MW platform in North America", said Chris Brown, President of Vestas' sales and service division in the United States and Canada, and continued, "This order demonstrates how we continuously improve the available technology to the benefit of our customers. These turbines will deliver low-cost, reliable wind energy to the region, all while generating millions in economic benefit for the community, and supporting growth in a thriving American manufacturing supply chain".*

Delivery is expected to begin in the third quarter of 2018, with commissioning planned for the fourth quarter.

The order includes supply and commissioning of the wind turbines as well as a multi-year Active Output Management 5000 (AOM5000) service agreement, Vestas' full-scope service package maximizing uptime and energy production.

Since its debut in 2010, more than 14 GW of the 4 MW platform have been installed in 34 countries around the world, including 2 GW in the United States.

The project and customer are undisclosed at the customer's request.

### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with 85 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 71 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,500 employees are bringing the world sustainable energy solutions to power a bright future.
