

News release from Vestas Wind Systems A/S

Malmø, 13 December 2017

Swiss utility BKW Energie AG places 54 MW order in Norway

Vestas has received an order for 15 V136-3.6 MW wind turbines for a 54 MW wind power plant located in Marker in south-east Norway. The firm and unconditional order is placed by the leading Swiss-based international energy and infrastructure company BKW Energie AG, which owns a large stake in the 1 GW Fosen Vind project that Vestas announced last year.

"We are convinced that with Vestas we can count on an experienced and high quality partner to meet our expectations for the Marker wind power project," says Martina Dabo, Head of Business Unit Wind, BKW Energie AG.

"BKW Energie AG is already very active in Norway with a large stake in the 1 GW Fosen Vind project, Europe's largest onshore wind park when in operation. We are therefore very pleased to continue the partnership and deliver our turbines and services to the Marker wind power plant," adds Klaus Steen Mortensen, President, Vestas Northern Europe.

The contract includes supply, installation and commissioning of the wind turbines. Delivery is expected to begin in the third quarter of 2018.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 87 GW of wind turbines in 76 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,700 employees are bringing the world sustainable energy solutions to power a bright future.
