

## News release from Vestas Asia Pacific

Singapore, 01 February 2018

# Customised solution secures Thai order with record-breaking hub heights

Vestas once again underlines its focus on innovation and leadership by securing a 45 MW order for 13 V136-3.45 MW turbines, all with a record-breaking hub height of 162 meter. The order was placed by Winchai Co. Ltd. for the Rom Klao wind farm, which will feature the highest wind turbine towers in Asia.

The V136-3.45 MW turbine features Vestas' advanced aerofoil design, the proven 4 MW nacelle, and the High Tubular Steel Tower technology making it a great fit to deliver high and efficient energy production in Thailand's low wind conditions.

Mr. Prompong Chaisrisawatsuk, Chairman of Winchai. Co. Ltd. says that *"With Vestas' proven track record in the Asia Pacific region and its ability to provide customised solutions for Thailand's low wind conditions, we are certain that they are the right partner to work with on this project"*.

Clive Turton, President, Vestas Asia Pacific adds that *"By partnering with Winchai Co. Ltd. on this exciting project, Vestas continues to be part of Thailand's journey towards reaching its goal of up to 40 percent renewable energy by 2036. The project features the tallest towers in Asia and once again proves Vestas' capability to offer the newest technology and develop site-specific solutions for all wind sites. Winchai is Vestas' third customer in Thailand, and with this order we have announced more than 350 MW in the country since 2015"*.

The Rom Klao wind project will be located in Mukdahan, a north-eastern province of Thailand, and will also include supervision of turbine installation, a 10-year Active Output Management 5000 (AOM 5000) service contract with the option of extension, and a VestasOnline® Business SCADA solution. Turbine delivery is expected by the end of 2018 with commissioning expected in the second quarter of 2019.

### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with 87 GW of wind turbines in 76 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,700 employees are bringing the world sustainable energy solutions to power a bright future.
