

Press release from Vestas Northern & Central Europe

Hamburg, 25 June 2018

Vestas debuts the V136-4.2 MW in Norway with 50 MW order from Falck Renewables Vind

Falck Renewables Vind AS, a Norwegian subsidiary to Falck Renewables S.p.A., has placed an order for 12 V136-4.2 MW turbine for the Hennøy wind project in Svelgen in the western part of Norway, which will be the first project with V136-4.2 MW turbines in Norway.

To accommodate the site's challenging climatic conditions and optimise the business case, Vestas developed a solution utilising the V136-4.2 MW and customised towers as well as a 15-year Active Output Management 5000 (AOM 5000) service agreement.

Toni Volpe, CEO of Falck Renewables S.p.A. declared: " *Our first partnership with Vestas dates back to the early 2000's in Spain, and we are now very pleased to announce a new agreement and have once again the opportunity to work with a world class leading partner*".

"With this order, Falck Renewables Vind AS shows full confidence in the solution we have developed and the efficiency of our technology. By introducing V136-4.2 MW turbine to the Norwegian market and using site specific towers, the Svelgen project achieves very competitive levelised cost of energy under extremely challenging climatic conditions and high wind speeds", states Nils de Baar, President of Vestas Northern and Central Europe.

The contract includes supply, installation and commissioning of the wind turbines with delivery and commissioning of the wind turbines expected to begin in the third quarter of 2019.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with 92 GW of wind turbines in 79 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 78 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 23,900 employees are bringing the world sustainable energy solutions to power a bright future.

The headquarters of Vestas Northern & Central Europe is located in Hamburg, Germany. The business unit is responsible for the sales and marketing of wind power systems as well as for the installation and operation of wind power plants in Germany, Benelux, Austria, the Nordics, UK, Ireland, Russia, the Baltics, Eastern Europe and Southern and Eastern Africa.
